This Conference Presentation is brought to you for free and open access by the William H. Hannon Library at Digital Commons @ Loyola Marymount University and Loyola Law School. It has been accepted for inclusion in LMU Librarian Publications & Presentations by an authorized administrator of Digital Commons@Loyola Marymount University and Loyola Law School. For more information, please contact digitalcommons@lmu.edu.

Institute for Research Design in Librarianship

Measuring the research readiness of academic and research librarians:

A project report of the Institute for Research Design in Librarianship (IRDL)

Kristine Brancolini Marie Kennedy Christine Chavez LMU|LA

ARL Assessment -- 08/04/2014

Agenda

- Brief Background on IRDL
- IRDL Goals and Objectives
- Assessment Plan for IRDL
 - Research proposals pre- and post-workshop
 - Social network analysis
 - Curriculum evaluation
 - Confidence pre- and post-workshop
- Confidence Scale
- IRDL Scholars in audience please stand!

Background on IRDL

- Grew out of a December 2010 survey conducted by Brancolini and Kennedy
- Surveyed academic librarians regarding their research experience, research confidence, and perceived barriers to conducting research
- Article published in C&RL 2012*

*Kennedy, Marie R. & Brancolini, Kristine R. (2012). "Academic librarian research: A survey of attitudes, involvement, and perceived capabilities." *College & Research Libraries* 73(5): 431-448.

IMLS Grant to Fund IMLS

- Submitted grant proposal to create a learning experience and support network for academic and research librarians
- Funded by IMLS Laura Bush 21st Century Librarian Program, 2013-2016

IRDL Summer Workshop

- 87 applicants for 2014; selected 25
- Each applicant submitted a proposal for a research project to be completed during 2014-2015 academic year
- Centerpiece of the program is a nine-day summer research "bootcamp" for academic and research librarians
- Convened on the LMU|LA campus June 15-26, 2014

IRDL Goals and Objectives

- Goal: Increase the number of academic librarians with specific research skills in conducting and disseminating the results of research
- Objectives:
 - Host a nine-day research workshop in the summer, with two instructors to provide the research curriculum and one-on-one consultation
 - Supplement with pre-workshop activities and ongoing support for the year

Addressing Librarian Needs

- Foster an environment of collegiality and support in the research process
- Provide instruction in areas needed to complete the research design for a project developed by each participant
- Encourage the dissemination of research through publication or presentation
- Instill confidence in Institute Scholars about the research process by providing clear instruction on each step

Assessment Plan for IRDL

- Results of assessment of Year 1 will inform changes for Year 2
- Four-part assessment plan:
 - Scoring of research proposals pre- and post-IRDL workshop – completed July 28-29
 - Social network analysis completed on last day of workshop
 - Mastery of curriculum content pre- and posttests throughout the workshop
 - Confidence administered survey right before workshop began and at the end

Other Evaluation Activities

- External reviewer from Colorado State Library who was on site for three days; interviewed instructors and participants
 - Identified from participants factors that contributed to learning
 - Identified from participants suggestions for improvement
 - Perceived outcomes from participants
 - Recommendations for improvement
- Survey of participants, incorporating feedback from external reviewer; sent out July 3 I

Research Question: Confidence

- Did participation in the IRDL Summer Workshop 2014 increase the confidence of participants with regard to completing the steps in the research process?
- Rationale: The psychological literature suggests that self-efficacy (confidence) might be an important factor in encouraging academic librarians to undertake research.
- Hypothesis: We predicted that the detailed confidence survey will identify gaps that will be addressed by the Institute, thus increasing each participant's confidence.

Confidence

- Important factor identified in the literature and in the 2010 survey
- 2010 survey provided less granular data than we wanted
- Chavez ran a factor analysis on original scale to determine which questions actually provide useful information
- Deleted one component ("Identifying research partners, if needed") but greatly expanded remaining questions

IRDL Confidence Scale

- I = Not at all confident
- 2 = Slightly confident
- 3 = Moderately confident
- 4 = Confident
- 5 = Very confident

Asked 38 questions in eight categories, with at least two questions in each categories.

Question Categories

- I. Turning a topic into a question that can be tested (3 questions)
- 2. Designing a project to test your question (6 questions)
- 3. Performing a literature review (5 questions)
- 4. Gathering data (11 questions)
- 5. Analyzing data (5 questions)
- 6. Reporting results written (4 questions)
- 7. Reporting results verbally (2 questions)
- 8. Determining appropriate reporting (2 questions)

Preliminary Results

- Participants scored significantly higher on the confidence scale post-IRDL workshop
- The means across all 25 were:
 - Time I = 91.16
 - Time 2 = 144.52
- The Paired Samples t Test was significant at < .0005 (SPSS reports as .000)

This result is not surprising, but what do the individual questions reveal?

Time I (Immediately before IRDL)

- The scores on individual questions ranged between 1.28 and 3.8.
- The lowest average score was for Q5.4: Knowing which statistical test(s) to run.
- Rounding out the lowest five questions:
 - Q5.3: Identifying which statistical package may assist you in analyzing your data. (1.44)
 - Q4.8: Knowing how to design a focus group (1.64)
 - Q4.3: Determining how many members of a population to include in your study (1.68)
 - Q6.4: Knowing how to report the results of the statistical test(s) you may have run (1.88)

Time I (continued)

- The highest average score (3.88)
 - Q3.4: Using relevant keywords to discover literature about your research topic
 - Q6.3: Knowing how to apply a style guide
- Rounding out the highest five questions:
 - Q3.3: Identifying appropriate information sources in which to conduct your literature review (3.52)
 - Q3.5: Determining if a piece of literature is an appropriate source for your research question (3.44)
 - Q7.2: Knowing how to adapt your written research paper for an oral presentation (3.12)

Time 2 (immediately after IRDL)

- The scores on individual questions ranged between 2.72 and 4.48.
- The lowest average score was on the same question 5.4: Knowing which statistical test(s) to run
 - However, the average increased from 1.28 to 2.72. It was the only score below 3.
- The highest average score was on Q3.4: "Using relevant keywords...," which was one of the two highest scores in Time 1.

Comparison Time 1 and Time 2: Lowest

Time I

Time 2

Lowest Averages

• Q5.4 = 1.28

• Q5.3 = 1.44

3.4

2.72

• Q4.8 = 1.64

3.84

• Q4.3 = 1.68

3.52

• Q6.4 = 1.88

3.04

Average = 1.584

Average = 3.304

Comparison Time I and Time 2: Highest

Time I

Time 2

Highest Averages

• Q3.4 = 3.88

• Q6.3 = 3.88

• Q3.3 = 3.52

• Q3.5 = 3.44

• Q7.2 = 3.12

Average = 3.568

4.48

4.4

4.28

4.4

4

Average = 4.312

Other Changes from Time 1 to Time 2

Eleven questions scored above 4. None scored above 4 on Test 1. In addition to the questions noted previously:

- Q1.1:Turning your topic into a research question (from 2.96 to 4.08)
- Q1.3: Determining if your research topic makes a contribution to the field, based on the relevant literature (2.8 to 4.16)
- Q2.2: Identifying other research studies similar to yours in order to examine the methods used (3 to 4.4)

Time I to Time 2 (continued)

- Q2.3: Exploring research designs that are appropriate for your question (2.28 to 4.24)
- Q3.2: Determining how your study can contribute to the existing literature (2.92 to 4.04)
- Q6.2: Knowing the components to construct a traditional social sciences journal article (2.32 to 4.16)

Use of the Confidence Data

- Will use in conjunction with other data gathered to:
 - Make changes to the IRDL summer workshop
 - Plan pre-workshop activities
 - Address remaining concerns throughout the coming academic year
- Other relevant data are scores on proposals, recommendations of external reviewer, and feedback from participant survey
