

Choosing a Discovery Layer

Foley Center Library, Gonzaga University

Discovery Wish List

- ▶ Update user interface / experience
 - Single entry point to all print, electronic and digital resources
 - ▶ Highlight ContentDM & other web resources
 - ▶ Faceted browsing
 - ▶ “Did you mean” suggestions
 - ▶ Minimize overload of searches
 - ▶ Replace WIN Borrow interface
- 

Vendor Demos September 2010

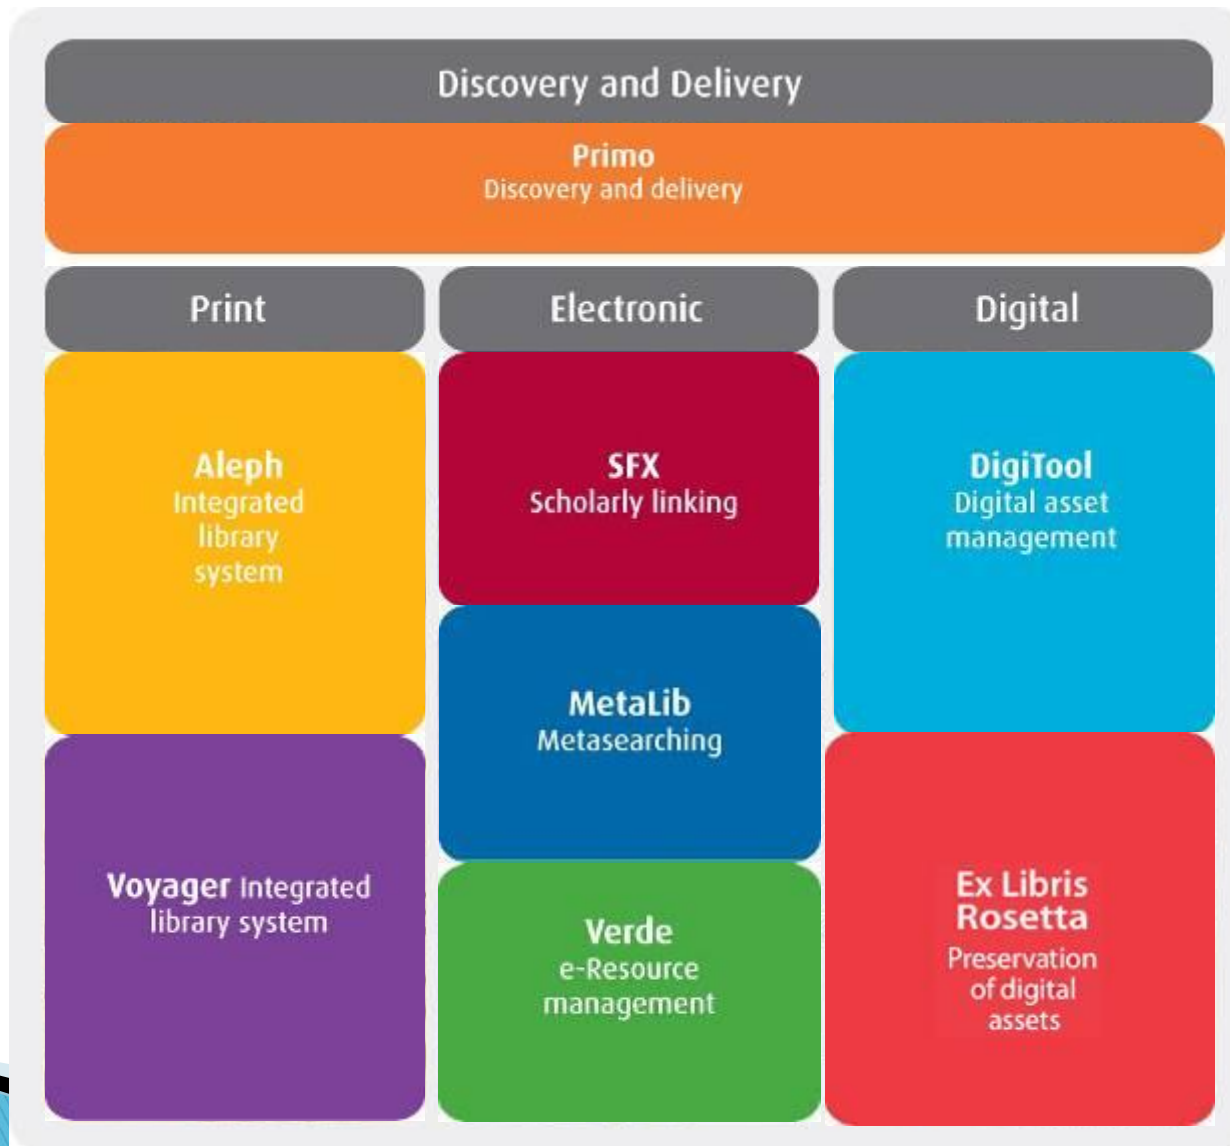

ExLibris Primo

ExLibris Primo

- ▶ 10 year partnership
- ▶ Cost
- ▶ Content neutral
- ▶ Switched to SFX OpenURL link resolver for best integration
- ▶ Eliminates current customization requirements for “Tomcat”
- ▶ E-shelf “My Research” storage
- ▶ bX Recommender Service
- ▶ Go live date June 2011

Primo Central

- ▶ Indexes scholarly materials such as articles and e-books provided by publishers and aggregators, and is seamlessly integrated into local Primo systems.
- ▶ Primo Central will be managed by Ex Libris as a service available to all Primo customers.
- ▶ Current coverage of GU materials: over 90%
 - 100% of top 100 most used titles

Total Care Option

- ▶ Hosted: lack of campus server space
 - ▶ Less expensive
 - ▶ “Quick” set up
 - ▶ No web customization skills needed
 - ▶ However:
 - Less customization options available
 - Delays in changing
- 

Implementation / Issues Ahead

- ▶ Cross departmental team implementing
 - ▶ Instruction adaptation
 - ▶ Website, tutorials, guide updating
 - ▶ Keep home page and Primo page?
 - ▶ Maintain two catalog interfaces?
 - ▶ First customer to implement intraconsortial borrowing in Primo
 - ▶ Normalization of verbiage
-

Title: Damage and repair of ancient DNA.
Author: Mitchell, David ; Willerslev, Eske ; Hansen, Anders
Subjects: [DNA Damage](#) ; [DNA Repair](#)
Is Part Of: Mutation research, Apr, 2005, Vol.571(1-2), p.265-76 [Peer Reviewed Journal]
Description: Under certain conditions small amounts of DNA can survive for long periods of time and can be used as polymerase chain reaction (PCR) substrates for the study of phylogenetic relationships and population genetics of extinct plants and animals, including hominids. Because of extensive DNA degradation, these studies are limited to species that lived within the past 10(4)-10(5) years (Late Pleistocene), although DNA sequences from 10(6) years have been reported. Ancient DNA (aDNA) has been used to study phylogenetic relationships of protists, fungi, algae, plants, and higher eukaryotes such as extinct horses, cave bears, the marsupial wolf, the moa, and Neanderthal. In the past few years, this technology has been extended to the study of infectious disease in ancient Egyptian and South American mummies, the dietary habits of ancient animals, and agricultural practices and population dynamics of early native Americans. Hence

The screenshot displays the Northwestern University Library website. At the top, a purple header contains the text "NORTHWESTERN UNIVERSITY LIBRARY" in white. Below this is a search bar with the placeholder text "Try our new search tool...". To the right of the search bar are two radio buttons: "Resources" (which is selected) and "Website". Below the search bar is a navigation menu with four items: "Find Materials", "Libraries & Collections", "Research & Instruction", and "Services".

On the left side, there is a "SERVICES" section with a list of links:

- Borrow Materials
- Course Reserves
- Interlibrary Loan
- Renew Materials

Below the services section is a "POPULAR LINKS" section with one link:

- NUcat - Library Catalog

On the right side, there is a "NEWS" section with a photograph of a tree with purple flowers. Below the photo is a news item with the headline "Google begins project to digitize".

Search

The screenshot displays the Emory University Libraries website with several search boxes and navigation elements. At the top, there is a dark blue header with the Emory University logo, navigation links (Home, Help, Login), and a search input field. Below this is a secondary navigation bar with categories like Learning Management, iTunes U, Libraries, and Help. The main content area features a large search box with tabs for discoverE, EUCLID, Databases, Guides, eJournals, and Site Search. A secondary search box is located below the main one. The page also includes a navigation menu with links like HOME, LIBRARIES, CONDUCT RESEARCH, SERVICES, INNOVATIONS, NEWS & EVENTS, and ABOUT. A featured section for MARBL Magazine highlights the new fall issue. A 'Quick Links' section provides access to research, help, services, and library information. A 'News' section mentions a guest reader. A second search box is positioned at the bottom, and a 'Ask a Librarian' link is also present.
