This Lesson 6: Complex Urban Ecosystems is brought to you for free and open access by the Urban EcoLab at Digital Commons @ Loyola Marymount University and Loyola Law School. It has been accepted for inclusion in Module 01: Introduction to Urban Ecology by an authorized administrator of Digital Commons@Loyola Marymount University and Loyola Law School. For more information, please contact digitalcommons@lmu.edu.

Urban Ecosystems

- An urban ecosystem includes
 - people among the living things, and the structures they build among the nonliving things.

Urban Ecosystems are Complex Interconnected Systems

 In urban ecosystems, humans influence ecological factors (plants, air, soil, animals

AND

 Human decisions (where to build houses, parks, highways, schools) are influenced by ecological factors.

An Urban Ecosystem is like a puzzle. To understand how an urban ecosystem works you need to understand that the four factors have impacts on each other
