This Lesson 7: Bird Biodiversity Data Collection is brought to you for free and open access by the Urban EcoLab at Digital Commons @ Loyola Marymount University and Loyola Law School. It has been accepted for inclusion in Module 06: Urban Biodiversity by an authorized administrator of Digital Commons@Loyola Marymount University and Loyola Law School. For more information, please contact [digitalcommons@lmu.edu](mailto:digitalcommons@lmu.edu).

Name: \_\_\_\_\_ Date: \_\_\_\_\_ Class/Period: \_\_\_\_\_

Time started: \_\_\_\_\_ Time completed: \_\_\_\_\_

Location: (describe where the survey is taking place)

**Weather:**

Air Temperature: \_\_\_\_\_

Circle the weather conditions:

Clear

Partly Cloudy

Cloudy

Rain

Snow

Describe the Weather Conditions:

**Bird Survey Data:**

	Time	Location	Bird Species	# of birds observed
1	8:04	corner of south and main streets	black-capped chickadee	2
2				
3				
4				
5				
6				
7

9				
10				

**Field Notes**

**Record any observations from your site visit below:** (What did you notice about the site today that could have impacted the data you collected? What kinds of human activity (e.g. car noise, foot traffic) did you notice? What other activities (e.g. dog barking) or characteristics (e.g. grass just mowed) were unique to your site today?)

**Reflection Question**

**What evidence did you see of factors that might affect the bird biodiversity at your site?**  
Particularly keep in mind factors which you encountered in the biodiversity game you played.
