How to Attract Hummingbirds?

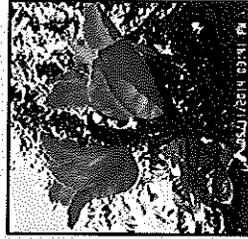

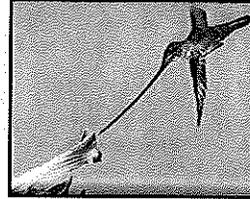

Feeders

- 1:4 sugar:water ratio
- Replace nectar every 4 days
- clean feeder thoroughly with dilute (1:10) bleach solution
- Hang in visible area from tree or shrub, out of direct sunlight

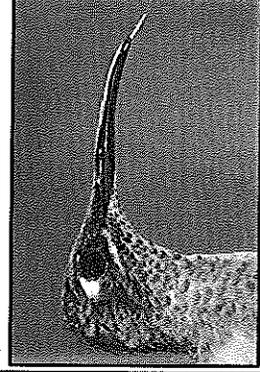

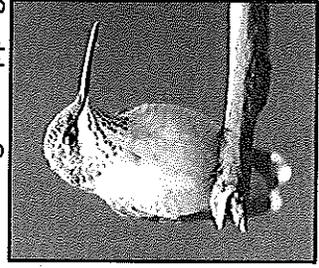

Flowers

- Often prefer red, elongated, tubular flowers
- Plant popular hummingbird flowers to naturally attract
- Examples: Western Columbine, California Fuchsia, Red Larkspur, Coral Honeysuckle, Nasturtium, Salvia Celestial Blue

Water

- Hummingbirds need to groom and clean feathers
- A very shallow dish or birdbath may encourage hummingbirds to visit
- Flowing or dripping water is preferred

Hummingbirds

Hummingbird Facts

- World's smallest bird
- Fastest animal metabolism
- Magnificent colorful plumage
- Over 300 species
- Endemic to Western Hemisphere
- Typical lifespan may exceed 10 years

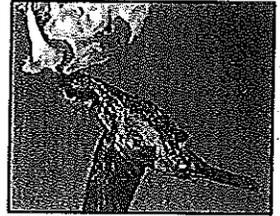

Habitat

- Diverse types
- Many species are extremophiles (thriving in extreme conditions)
- Ability to use torpor (greatly reduced metabolic activity) to cope with environmental conditions
- Many species are synanthropic, thriving in association with humans

Diet

- Nectivorous (energy and water) and Insectivorous (protein)
- Drink up to eight times body weight in water and nectar each day
- Important ecosystem service: pollination
- Close relationship between bill morphology and flower morphology due to mutual benefits and specialization (co-evolution)

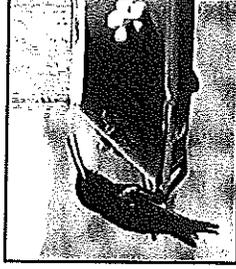

Flight

- Ability to fly in all directions and orientations due to wing anatomy
- Acrobatic, high speed (up to 50 mph) display flight patterns
- Wings can beats from 50 to 200 beats/ second

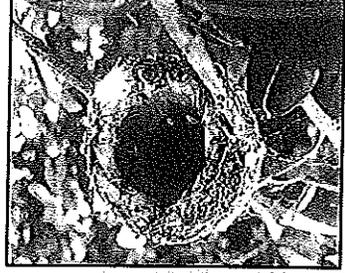

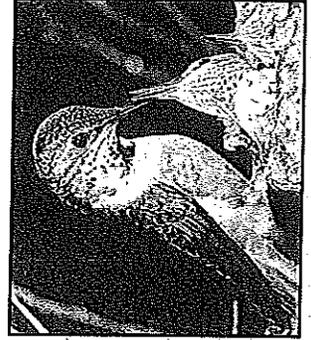

Physiology

- Ability to use torpor to cope with inability to feed at night
- Can drop body temperature from 40°C to below 20°C
- Heart rate is normally 500- 600 beats per minute, but can exceed 1000 bpm

Reproduction

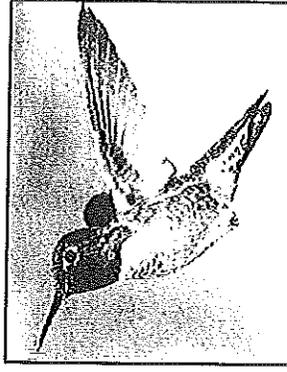

- Colorful, iridescent plumage, and acrobatic courtship displays to attract mates
- Female solely cares for young while males often defend territory
- ~15 day incubation period
- ~20 day nestling period

Common Southern California Species

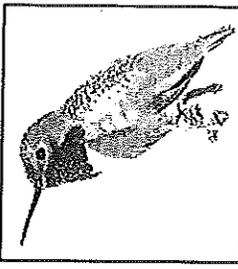

Anna's Hummingbird Juvenile

Anna's Hummingbird (M)

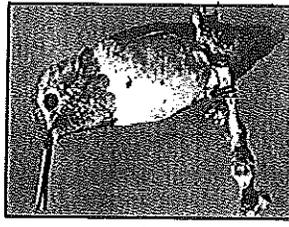

Anna's Hummingbird (F)

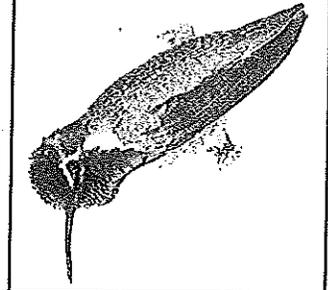

Allen's Hummingbird

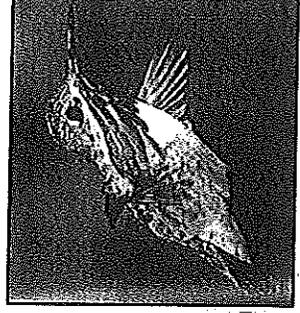

Black-chinned Hummingbird

Rufous Hummingbird

Costa's Hummingbird

Calliope Hummingbird
