## GENERAL ANNOUNCEMENTS

### MESSAGE FROM THE DEAN

#### ATTENTION: LAW SCHOOL COMMUNITY

We were fortunate that there were no injuries to anyone at Loyola during the earthquake Thursday, October 1. The damage to most of our buildings was very minor and will be repaired promptly. All buildings have been inspected by structural engineers and they have determined that the building at 1420 West Ninth Street is no longer structurally safe for occupancy.

We will immediately relocate all activities from that building to other locations on campus or to rented space nearby. As you know, we are moving rapidly to propose a plan to construct a new building on that site.

### REMINDER!

**DEADLINES FOR SBA BULLETIN ARE NOON WEDNESDAY - NO EXCEPTIONS** Beginning with the next issue of the SBA Bulletin, the deadlines for submission of articles will be strictly observed by the Office of Communications. All articles must be typed double-spaced and turned in to Rhonda Tartaglio in the Dean's Suite of the Burns Building no later than noon on Wednesdays. No exceptions. If you have typed your article on Xywrite, give your disk to Lily Kuo in B-234 and she will copy it. Fran Pullara says thanks as the workload of Communications is heavy and staff is limited. Call Fran at ext. 1043 if you have questions about the SBA Bulletin.

**NEWS FROM COMPUTER RESEARCH CENTER**

The Computer Research Center in the Library has doubled in size. The Center traded in its old IBM-PC's for new PS/2 Model 30's because IBM has discontinued manufacturing the PC and the XT with the larger floppy diskettes which you used last year. Data files already created on 5-1/4" floppies and programs other than XyWrite and Wordstar must be converted from the larger to the smaller diskettes. The conversion process is as simple as copying a file from one diskette to another - a couple of minutes; and two terminals are available for conversion only. BUT here's an invitation and a plea: do it now, not the night before your resume or your term paper is due, when everyone in town will be trying to use the same machines.

\* How do you convert?

There is a step-by-step handout available at circulation checkout. You will, of course, need to bring your own blank 3-1/2" disk(s) with you.

\* Why didn't the Center buy PC clones?

Because we wanted to standardize, in part to better manage troubleshooting, and because it seemed a better long-range investment. The smaller disks hold twice as much data as the older, larger ones, and are much more durable, giving rise to fewer problems. If you have a 5-1/4" system at home, you can add a 3-1/2" drive to that system for around \$140 and avoid the problem of carrying identical or similar files on different size disks.

\* Where can you get these 3-1/2" disks?

There is a list of supplies available at circulation checkout and they are now in stock at the Bookstore. Be sure to double-check prices and to buy double-sided double-density disks. The single-sided double-density may format the same (720k) amount of data, but are error-prone; unlike double-sided, they cause physical wear on the drives.

\* Why aren't the additional terminals set up in carrels like the others?

They will be. Delivery of the furniture has been delayed, but it should be here in mid-October.

\* Why didn't we know about this?

We apologize if the large, colorful notice posted at the beginning of the semester and warning of the change was insufficient to alert you to it. We were unsure of the delivery date of the new terminals until the day they arrived.

\* What's the situation with the printers?

As of this writing, only one Laserjet printer is connected to four terminals. We are awaiting the cables required to hook up the second Laserjet; when the furniture arrives, we will install a third and fourth Laserjet printer. The two Epsoms are still available, attached to Model 30's.

\* Why do you learn word processing?

Loyola uses the XyWrite program. You should purchase a copy of the self-help tutorial from Graphics (also available on reserve at checkout). Reserve a terminal for two hours, checkout a XyWrite disk, and bring two blank disks of your own.

\* Why didn't you retain a few of the old terminals for people already dependent on the 5-1/4" system to continue to use? Because almost everyone fits into that category, we would have had 95% of the users lined up for one or two of the twenty terminals. Once you see how simple conversion is, you won't miss the old machines.

\* Are there any other advantages to these new computers?

Yes. All have 640 k of RAM. This means that rarely will anyone reach memory capacity and suffer a freeze. Nor is it now necessary to chain-print long papers. With 640k these machines can easily handle a single file of as much as a hundred pages or more. 3-1/2" diskettes are state of the art for MacIntosh and Amiga, and now for IBM. Soon clones, too, will feature them. The durability and size of the hardshell floppies make them far superior. Technology rushes ahead.

Thanks for your patience and your understanding.

## WRITING COMPETITION

Entries must be postmarked no later than November 1, 1987 and mailed to:
