Identifying and Preparing Resources

Module 10 - Garden Ecology Lesson 4: Preparing and Identifying Resources

Why is it important to Identify and Prepare Resources?

1. If you don't have your resources identified and lined up you may not be able to implement your Vision.
2. Resources are necessary to put in any kind of garden, they must be secured ahead of time, and they might become available in stages.
3. Once you have your resources identified you can start laying out a plan based on their availability, and prepare for their utilization.
4. If you don't have everything identified and lined up before you start you may not be able to get the resources when needed.
