Lesson 6: Planting Day!

The Three S's: Staging, Supplies, Students

Staging

Students

Supplies

How will we have a successful garden planting experience?

1. In order for us to have a successful garden planting experience, everyone will need to work together and will have a role in the process. Be supportive of team members if they need help with their role as well.
2. If you are in charge of supplies for your group, make sure you know where the supplies are located and that you have everything the group will need.
3. This project is a group effort. You will be shown, step by step, how to plant plants, such as how and where to dig the holes, the proper way to take plants out of their containers, and how to place them carefully in the holes.
4. For the student(s) in charge of digging holes, be safe when you are digging – make sure no one is in the way of the shovel. Never swing tools around.

Before and After!
