Metal Detectors in Chicago Public Schools

Siobhan Collins; Political Science & Philosophy
Mentor: Professor Brad Stone, Philosophy
Metal Detectors are Present in Many Schools

Metal detectors have been implemented in schools en masse in the 1980s in an effort to keep the “outside” from entering the school.

In 2015–16, 94 percent of public schools control access to school buildings.

Metal detectors are in about 10% of schools nationwide (CPS, LAUSD, NY).
Metal Detectors Cause Many Problems, But Are Still Widely Used

Infringes on 4th Amendment rights

Poor students of color are more subject to harsh disciplinary measures than their wealthy white counterparts

Schools → Prisons

Question: If metal detectors have proved to cause so many problems, why are they present in so many schools? - Corporate greed
Research Question

Do companies that produce metal detectors attempt to influence politicians in ways that would increase the presence of metal detectors in schools?
